

Calculate maintenance correctly

Child maintenance

Age of children	Per cent
0 to 6 years	16%
6 to 10 years	18%
10 to 15 years	20%
from 15 years	22%

Further maintenance obligations	Deduction
per additional child up to 10 years	minus 1%
per additional child over 10 years	minus 2%
Ex-spouse or spouse	minus 0% to 3%

Assessment basis (BMG)

exact: annual net income of the debtor divided by 12 (without family bonus plus)

roughly (for 14 salaries): Monthly net income times 14 by 12

without family bonus plus, with benefits in kind, overtime, bonus payments, allowances at 50%

Standard requirement and maintenance freeze (luxury limit, playboy limit)

Maximum maintenance: standard requirement x 2 / x 2,5 (up to 10 years / over 10 years)

as 1.1.2024	From birth	from 6 years	from 10 years	from 15 years	from 20 years
Standard	340	430	530	660	760
Luxury limit	680	860	1.325	1.650	1.900

Family allowance and child deduction

are due to the main carer without being offset against maintenance.

Care by both parents, self-care or third-party care

If the child receives above-average care (dual residence) or lives in a household without parents, maintenance is calculated differently.

Family bonus plus

has no influence on maintenance. It (only) reduces the income tax.

For children under the age of 18: € 2,000.00 per year, from the age of 18 € 650.00 per year.

Allocation by agreement: caring parent 100% / maintenance debtor 100% / both 50%.

Spousal maintenance

1. Maintenance creditor has no income

33% of the BMG of the debtor, minus 4% per child.

2. The person entitled to maintenance has their own income

40% of the BMG of the debtor, minus 4% per child, minus own income.

I will be happy to determine the correct assessment basis for you and calculate the maintenance.

Date

Past to present, not future.

Net annual income

by 12 (without Family Bonus Plus, with benefits in kind, overtime, bonus payments, allowances at 50%).

Luxury limit

is not taken into account.

Reduction or load limit

If the income of the person liable to pay maintenance is at risk, the online calculation is not always correct.

Spouses and ex-spouse

Only enter the income of the ex- and/or spouse if there is a maintenance obligation. Current and former spouse also possible.
